Mandala Art incorporating Sacred Geometry

Mandala art is about circles and symbolises cosmic, spiritual sense of self and Universe, which evolves to oneness and revolves around a centre which is the source of creation.

Sacred Geometry is all about the concept that some shapes and forms form the fundamental templates for life in the Universe.

In combination, Mandala and Sacred Geometry forms a potent blend of art with an intuitive and imaginative expression.

Varaaz Arts has exhibits, that incorporate the true elements of traditional Mandala and infused the concepts of Sacred Geometry. The result - is a truly stunning array of paintings that have deeper meanings and connect to energies as well as the Universe than our casual senses would imply.

Sacred geometry Mandala art portrays the vastness of the universe and the essence of our being. Through concentric shapes and vibrant colours, these artworks represent the physical, psychological, and spiritual aspects of existence. They are intuitively created, embodying the principles and patterns of Mandala art. They hold the power to infuse your interior decor with profound meaning.

Creating a Sacred Geometry Mandala is an enriching practice that enhances cognitive skills, expands knowledge of shapes and colours, and fosters emotional well-being. It provides a profound experience of circular harmony while developing coordination and psychomotor skills in perfect balance.

ABOUT THE ARTIST

Varalakshmi Bharanidharan

“My INSPIRATION, 'Peace,' is so un-materialistic in nature, but every living being strives to achieve it in one form or another. I have always had a craze to do things differently, and this inspired my interest in Mandala Arts. With around a decade of experience and the completion of a course in Fine Arts (BFA) from Bharati Kala Kendra, Lucknow, in the year 2015, and as an Art counsellor, there is no looking back. Today, I have 1000 plus creations to my credit and have rich expertise in Conceptual Mandala Arts, infusing sacred geometry. All my creations are hand-drawn, hand-painted, and mostly pen, pencil, and canvas works, with some monochromatic Mandalas in the same series using watercolour and pen.”

Why I choose MANDALA ART?

I love art and wanted to stand unique and give a strong message through my work and nothing better than Conceptual Mandala arts could have been my choice. The connotation and magnitude seemed completely unique in this category of art. As this form of art deals with human psychology. I found a more enthusiastic and positive vibe while Working on my paintings.

It is one of the best ways to connect with yourself and can lead to higher planes of existence, eventually radiating those positive vibes. Conceptual Mandala art has the capacity to translate complex mathematical expressions into very simple shapes and forms, thereby helping us understand how the basic patterns governing the evolution of emotions in us can work out in the most beautiful way.

WHAT IS MANDALA?

Mandala represents a circle in Sanskrit language. Mandala is a joint of 2 words “**Manda**” meaning essence and the “**LA**” means container, which translates to container of essence. Mandala signifies that every wave has a centre, around which the action takes place. We can compare the centre to life around which all things revolve. True to its name, Mandala art is all about representation of the cosmos, the Universal energies, the self and the balance within the circle. There is only evolution!

Sacred Geometry is referred to as the “**Art of the Universe**” and is found all through the natural world. It is also one of the very few forms that appeal to and balance the left and the right brains. It is the art and science which connects us to the cosmos. Sacred Geometry reveals the source creation of the universe, and the evidence can be seen in the natural world around us.

Observing Mandalas and in conjunction with Sacred Geometry can give us a deeper understanding and spiritual meaning of the nature and Universe, which in turn aligns the soul and spirit with the universe and helps in developing a greater sense of awareness in yourself as well as in your spiritual practice.

HOW TO OBSERVE THE MANDALAS

Zero - We begin with a history of the same points that are at the center of the Mandala. From there, geometry tells us the story of how shapes take their form. The zero-dimensional point enters the first-dimensional community through the addition of

another point to create a line. By adding a third point to the mix, you get 2 dimensions. Things get deep, so to speak, when 4 points come together, creating 3 dimensions. After a tour of the shapes, you would enter the realms of patterns, which will enhance your appreciation of the shapes you just visited.

POINTS IN COMMON

Structured things usually need a centre or a point to organise around. For example, material substances are made up of particles that seem to move around a central nucleus. In conversations, having a main point is crucial; without it, our lives may feel purposeless.

But can we identify the exact point or centre of everything? In physics, when we closely look at tiny particles using powerful magnification, we discover that space is filled with the potential for things to exist.

The basic shapes we infused in our art as follows.

SIGNATURE MANDALA

A Signature Mandala is a unique creation formed using the Akshara Sankhya and Katapayadi numbering system. The process involves converting a name or statement into numbers, compressing them digitally, placing them within a segmented circle, and connecting them to form a visually appealing shape. This personalised approach infuses the Mandala with natural power, making each one distinctive and tailored to the individual or project.

Need & purpose of Mandala Art in Home Interior

- Creating Harmonious Spaces
- Balancing Energy
- Thematic Design
- Customization and Personalization
- Personalized Home Decor

Geometric Harmony:

Balanced Design: The use of these shapes can contribute to a sense of balance and order in interior design, creating a visually harmonious space.

Focal Points:

Centralized Focus: The central point of a mandala is a common feature. When applied in interior design, this central focus can be strategically placed to draw attention to specific areas or elements within a room.

Spatial Perception:

Illusion of Space: Repeating shapes and patterns in mandalas can create an illusion of depth and dimension. When translated into interior design, this can enhance the perception of space, making rooms appear larger or more dynamic.

Energy Flow:

Flow and Movement: The use of circular shapes in mandalas can suggest a sense of movement and flow. Incorporating circular design elements in interiors can guide the eye and create a sense of continuity throughout the space.

Personal Expression and Reflection:

Self-Discovery: Designing a personalized mandala allows individuals to express their creativity and convey aspects of their identity, beliefs, or experiences. It becomes a form of self-reflection and a way to visually represent personal narratives.

Ekam Advityam

Category: Sacred Geometry Mandala

Size: 5 Feet /5 Feet

Medium: Acrylic and Oil with Pure Gemstones embedded (Sphatika)

DESCRIPTION: At the centre, in blue is the 'Flower of life' appearing in a hexagon shape. The flower of life represents the blueprint of the universe - the DNA. This comprises 19 overlapping circles with 90 petals, 54 triangles and represents that all existence, creation, as well as knowledge originated from the same source. You can see this visually, beginning with the centre circle and moving outward with each loop. It represents harmony, connection with Nature and the Universe, a visual depiction of life, and growth.

This lies within a hexagon, the most common shape found in the universe. It is also the most stable and the strongest binding shape in existence.

This is surrounded by the Torus which is a graphical representation of the balance between spirit and matter - this only happens when energy is aligned.

The basic form of the Torus explains the ascent from matter to the spirit or the descent from spirit to matter through a tube of consciousness, energy, or light. It is believed that an object's energy can only go so far in a single direction before doubling back and returning to its source.

This also represents the ascent or growth of self which is limited within a particular cycle after which it goes into descent and the cycle repeats itself, growing bigger each time as the individual evolves with harmony of energies and balance.

UNIQUENESS of The Creation – The Creative!

This creative represents the harmony of creation, life and the constant balance in the Universe. All creations emanate from the same source and have the trademark DNA (Flower of Life). This happens – in a calm grounded manner (blue colour) within a powerful framework of stable purpose (hexagon).

All creations then evolve, gain energy and maintain the Universal balance, the positivity (Sphatika) - as it ebbs, flows through crests and troughs in multiple cycles (Torus) represented in pink upward triangles and brown downward triangles while growing in stature all the time (green background).

There is the appearance of a quartz stone, Sphatika - which is a powerhouse of energy and positivity that absorbs, stores and amplifies positive energy. It also wards off negative energy!

A lotus has 1000 differently coloured petals. A yogi reaches zenith of his consciousness when Kundalini energy travels to the Sahasrara chakra through the lower chakras.
